Dear Dr Schroder,

The following changes have been made to my academic thesis in order to meet the specified amendments.

1) All typographical and referencing errors marked in the hard copy and identified through further proofreading have been corrected.

2) In Chapter 2:
   - A paragraph has been added to bottom of page 16 outlining the power analysis and the justification for medium effect sizes. The additional reference included has also been added to reference list.
   - The observed effect sizes have been incorporated into Tables 3 and 4 on pages 27 and 30 as well as incorporated into any results written throughout the text.
   - Information has been added to the second paragraph on page 34 outlining what the effect sizes mean for the results of the current study. The additional reference included has also been added to reference list.
   - Three paragraphs have been included (see pages 35 and 36) and information has been added to the second paragraph on page 37 outlining a critical review of the samples and reflecting what this means for the generalisability of the findings. Additional references included have also been added to reference list.

3) In Chapter 3, the PRISMA diagram (Figure 6 on page 51) has been expanded to incorporate information about the criteria for the exclusion of 53 studies

4) In Chapter 6, the following changes have been made to provide a concise synthesis of the work in terms of theoretical implications, clinical implications, and recommendations for future work, appraising the respective weights of evidence derived from the different parts of the thesis:

- Paragraph one on page 136 has been amended to provide more contextual information about the association between stalking and IPV.
- Paragraph two on page 137 has been amended to provide more context for Chapter Three and how it relates to the overall theme of the thesis.
- Paragraph two on page 143 has been added to provide information regarding the weights of the evidence derived from each chapter. This is also illustrated in Figure 9. Additional references included have also been added to reference list.
- Figure 9 had been added to page 145 to provide an illustration of the overall findings of the thesis outlining theoretical implications, clinical implications, and recommendations for future work whilst also taking into account the weights of the evidence derived from each chapter.
- Paragraph three on page 147 has been amended to provide more information regarding implications for practice.
- The following have been added/amended to provide further suggestions for future research:
    - Paragraph two on page 150
    - Paragraphs one and two on page 152
    - Paragraph one on page 153
    - Figure 10 on page 153
- The conclusion on page 154 has been amended to reflect the changes outlined above.

The Table of Contents, List of Tables and Figures, and List of Appendices have also been altered to reflect any additions and changes in page numbers. I hope these are completed to your satisfaction.

Kind regards,

Louise Storrar
